Portability and Interoperability Features in **Robocheck**

Bachelor Presentation Session - September 2012

Scientific Adviser

as. dr. ing. Răzvan Deaconescu

Author

Laura Vasilescu

Project Proposal

Project Proposal

- **solve usability issues**
 - expand Splint module with other error types
 - modify Simian parser

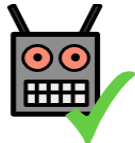

Project Proposal

- **solve usability issues**
 - expand Splint module with other error types
 - modify Simian parser
- **simplify configuration process**
 - tool for generating configuration file instead of XML edit

Project Proposal

- **solve usability issues**
 - expand Splint module with other error types
 - modify Simian parser
- **simplify configuration process**
 - tool for generating configuration file instead of XML edit
- **provide portability for Windows platform**

Project Proposal

- **solve usability issues**
 - expand Splint module with other error types
 - modify Simian parser
- **simplify configuration process**
 - tool for generating configuration file instead of XML edit
- **provide portability for Windows platform**
- **integrate**  **ROBOCHECK** with  **vmchecker**

Porting Robocheck to Windows

Porting Robocheck to Windows

- find suitable libraries

Porting Robocheck to Windows

- find suitable libraries
- C89 vs. C99

Porting Robocheck to Windows

- find suitable libraries
- C89 vs. C99
- unloading library issues

Porting Robocheck to Windows

- find suitable libraries
- C89 vs. C99
- unloading library issues

Result: Robocheck runs on Windows!

Porting Robocheck to Windows

Result: Robocheck runs on Windows!

What about Memcheck ?

Porting Robocheck to Windows

What about Memcheck ?

Porting Robocheck to Windows

Dr. Memory

- an alternative to Valgrind/Memcheck
 - reduced execution time
- Open Source project
- runs both on Linux and Windows

Robocheck Interoperability

Robocheck Interoperability

- unified error reporting mechanism

Robocheck Interoperability

- unified error reporting mechanism
- easy to parse output (JSON)

Robocheck Interoperability

```
{
  "result":
  [
    {
      "name" : "Memory leak",
      "key" : "New memory leak modification",
      "value" : "0.30",
      "where" :
      [
        { "line" : "In function IndexOf, in file darray.c, at line 144" },
        { "line" : "In function Remove, in file darray.c, at line 163" },
        { "line" : "In function Delete, in file darray.c, at line 197" }
      ]
    },
    {
      "name" : "Duplicate code",
      "key" : "Duplicate code in sources",
      "value" : "0.20",
      "where" :
      [
        { "line" : "Duplicate lines: darray.c[165-188] darray.c[199-222]" }
      ]
    }
  ]
}
```

Robocheck Interoperability

Robocheck Interoperability

- creates testing environment
 - VMware, LXC, KVM
 - any operating system

Robocheck Interoperability

- creates testing environment
 - VMware, LXC, KVM
 - any operating system
- runs testing scripts

Robocheck Interoperability

- creates testing environment
 - VMware, LXC, KVM
 - any operating system
- runs testing scripts
- used for 4 years in CSE Department
 - Programming in C, USO, SD, PA, RL, SO, SO2, CPL

Robocheck Interoperability

Robocheck Interoperability

- run Robocheck

Robocheck Interoperability

- run Robocheck
- retrieve output

Robocheck Interoperability

- run Robocheck
- retrieve output
- integrate in *grade.vmr*

Robocheck Interoperability

Nota și observații

```
+0.0: nice coding style :)  
-- Irina
```

Date și depunțări

```
Data trimiterii temei : 2012.03.18 13:23:45  
Deadline temă : 2012.03.27 23:50:00  
Temă trimisă înainte de termenul limită cu 9 zile 9 ore 26 minute 15 secunde.
```

```
Depunțare întârziere : 0  
Depunțare corectare : 0.0

Overview

- solve usability issues
 - expand Splint module with other error types
 - modify Simian parser
- simplify configuration process
 - configuration tool instead of XML edit
- ensure portability for Windows platform
- integrate with  vmchecker

Future Development

Future Development

- expand functionalities of the integrated tools

Future Development

- expand functionalities of the integrated tools
- multiple programming language support
